

International Symposium on Social Management Systems 2010

4 - 6 March, 2010 Kochi, Japan

First Announcement & Call for Papers

Objective

“Social Management Systems” is a new scientific system which gives us a principle thinking how we are able to define the structure of socially unsolved problems, and what kind of theoretical thinking we have to follow to create management systems which solve problems and evolve the society, as well as a new scientific field which gives us methodologies to create these management systems.

Kochi University of Technology and Society for Social Management Systems have been organizing the international symposiums related to Social Management Systems annually since 2005. “SSMS 2010” will also promote this research field through the invited lectures, presentations and discussions by the participants from all over the world.

Topics

- a) Social system management
- b) Integration of Social sciences and Natural sciences
- c) Public management for local government, policy making, water resource, etc.
- d) Entrepreneurship and Management
- e) Regional vitalization management; business, sustainable society, etc.
- f) Environmental management of country scale and municipal scale
- g) Technology integration management including social sciences
- h) Infrastructure asset management
- i) Construction management
- j) Disaster prevention management
